CLEANING & MAINTENANCE

Normal cleaning of glass mosaic tile can be done with room temperature water or cleaner and a soft lint free cloth. Regular and proper maintenance is key. For a more thorough cleaning and to remove stubborn dirt and stains, use any of the many tile and grout cleaners available through tile dealers or home centers.

The Tile Council of America offers detailed grout cleaning information on their website, www.tileusa.com (under "Technical Services" scroll text down to "Tile Technical Reference Library", click "frequently asked questions and answers", click "Cleaning Grout").
